

SOUND GENERATORS – COMPLETE UNIT – TO USE “AS IS” IPOD® NOT REQUIRED

Everyday sounds may mask the tinnitus during the daytime, making it either easier to deal with or completely inaudible so, for some people, tinnitus can become more of a problem during quiet times of the day or at night. Many people find relief from tinnitus by adding an external competing sound at a constant low level. Sound generators produce a constant sound designed to make tinnitus seem less intrusive. These devices appear to offer more benefit when combined with other therapies than when used alone.
